

Environmental Performance Report

COPIFOR 2025

1. Our company
2. Our environmental
commitment
3. Our environmental
footprint

1. Our company

COPIFOR, S.L.

Copifor S.L. is a company specializing in the production of paprika and spices, with a history spanning more than 90 years in the agri-food sector. Our business combines tradition, innovation and a firm commitment to quality, positioning us as a leader in both the domestic and international markets.

Our origins date back to 1930, when Jesús García Muñoz started a family business focused on the cultivation and processing of paprika. This legacy was consolidated in 1968 with the start of industrial production, under the management of the second generation of the family.

In 1987, the production process was professionalized through the incorporation of Pimentón Forca S.A., establishing a business structure geared towards strategic growth and expansion into new markets. The creation of Copifor S.L. in 1992 marked the birth of our current corporate identity, with a clear industrial focus and an export-oriented approach, dedicated to the production and marketing of paprika and a wide range of spices.

Today, Copifor S.L. is undergoing a new phase of expansion, committed to technological innovation, environmental sustainability and the continuous improvement of our production processes. With a strong customer focus, high quality standards and a dedicated team, Copifor S.L. continues to grow as a leading company in the paprika and spices sector.

2. Our environmental commitment

COPIFOR, S.L.

As part of our commitment to environmental conservation and protection, **COPIFOR, S.L.** produces an Environmental Performance Report to inform stakeholders about our environmental performance for the year, as well as the environmental commitments and objectives set out in our environmental strategy.

In recent years, we have worked to improve our organization, implementing sustainability initiatives and committing to environmental protection and to reducing the impact of our activities on the environment.

Since 2022, we have been working on a **carbon footprint reduction strategy**, calculating our emissions from 2021 to the present day and implementing reduction measures based on the results.

This year, we have also decided to implement an **environmental management system** to ensure that all the necessary mechanisms, procedures and resources are put in place to minimize our organization's environmental impact and prevent pollution. Our commitment to the environment is set out in our Quality, Environment and Food Safety Policy:

The COPIFOR Board of Directors has decided to commit to implementing a Quality, Environment and Food Safety Policy aimed at the company's development, the production and marketing of safe, hygienic and legally compliant products, stakeholder satisfaction, sustainability and environmental protection. This policy is necessary to achieve the objectives and commitments we wish to fulfill.

To achieve these aims, the company will focus on the following objectives:

- To associate the company's image with high standards of quality and food safety.
- To foster a culture within the organization that enables us to anticipate our customers' needs, with the primary aim of meeting their expectations.
- To ensure compliance with current legislation governing food safety, legality and the authenticity of the products manufactured and marketed. We are also committed to meeting the food standards agreed with our customers and to strict compliance with all applicable environmental legal requirements relating to our business and products.
- To implement effective practices and procedures to prevent and reduce food waste by putting reduction measures in place.
- To provide the resources to develop a plan to foster a culture of quality and food safety within the organization.
- To ensure the implementation of a culture of continuous improvement within the environmental management system, enabling us to enhance our environmental performance and minimize the environmental impacts associated with our operations, primarily waste, air and GHG emissions, consumption of natural resources and wastewater discharges.
- To ensure environmental protection by respecting the natural environment in which we operate, as well as the prevention of pollution and the sustainable use of resources.
- To provide the necessary resources to ensure the effective implementation of health and safety measures for workers, from both an ethical and an occupational perspective.
- To involve all staff in continuous improvement.
- To adopt specific and measurable annual targets in the areas of quality, food safety and environment.
- To improve internal organization and raise the level of operational efficiency.

Balsicas, December 4, 2025

Our environmental objectives

**Reduce Greenhouse
Gas emissions**

**Reduce the amount
of packaging placed
on the market**

**Reduce the amount
of waste generated**

3. Our environmental footprint

COPIFOR, S.L.

We monitor and minimize our consumption to reduce our use of natural resources and energy.

We monitor and minimize waste generation, prioritizing strategies for prevention, reuse and recovery.

We monitor and reduce the amount of packaging we place on the market, and prioritize the use of recycled or sustainably sourced materials.

**“Be the change you
wish to see in the
world”**
